

7<sup>TH</sup> December 2012.

Dear Sir / Madam,

**Hazard Statement – Cooltrans Sustain<sup>CTS</sup>**

Kilfrost Cooltrans Sustain<sup>CTS</sup> has been formulated using sustainably sourced corn derived propylene glycol. Propylene glycol is practically non-toxic to aquatic organisms and is rapidly biodegradable. Kilfrost Cooltrans Sustain<sup>CTS</sup> has been classified as non-hazardous according to CLP. Tests have shown the product has low oral toxicity; LD<sub>50</sub> >5000mg/L (oral, rat – OECD 423)

We can confirm that the formulation does not contain borates, silicates, amines, phosphates nitrates or nitrites and does not contain any components listed as Carcinogenic, Mutagenic or toxic to Reproduction. (CMR)

For additional information, please refer to product technical support guide and safety data sheet.

Best regards,

Laura Clement
